

Abstract

This invention relates to a mobile communication device (200)
5 having a functional cover (202) for controlling sound
applications by means of measuring motion of said functional
cover (202). In particular, the present invention relates to a
functional cover (202) for a mobile communication device (200)
measuring motion and providing a control signal to the mobile
10 communication device (200) in accordance herewith.
